WORKSHOP

Smartphone Troubleshooting

I attended a “Smartphone Troubleshooting” workshop at the New Technology Mobile Service and Training Institute.

Place: Chennai
Date:

PROJECTS

Portfolio

Developed a personal portfolio website showcasing skills in HTML, CSS, JavaScript, and Java Server Pages (JSP), with responsive design for multi-device compatibility. Integrated Java SMTP for contact form functionality, demonstrating expertise in web development and Java programming. Utilized Git for version control. The website highlights projects and emphasizing proficiency in frontend and server-side technologies.

Role: Front-end, Java SMTP Code

IoT-Based Passenger Authentication System for Transportation Services

Developed an 'IoT-Based Passenger Authentication System' using RFID technology to enhance passenger authentication and automate vehicle door operations. The system verifies passenger authenticity through RFID-based unique identities, personalized security questions, and OTP communication. Streamlining access and ensuring passenger safety.

Role: Coding and Circuit Design

Enhancing Aquaculture Yield Through Data-Driven Fish Species Recommendation System

I developed a web application that employs a linear discriminant algorithm to offer targeted food recommendations for aquaculture fish farmers. The application features a user-friendly interface with a responsive design, enabling farmers to input specific requirements and receive tailored food suggestions based on their aquaculture operations.

Role: Front-end, Back-end, Django Framework and Python coding

Symposium of CyberTalk'22 Website

Developed a college symposium website enabling candidates to register their details seamlessly. Designed and implemented an intuitive web interface that facilitated efficient registration and information management. This project highlights my web development skills and ability to create user-friendly platforms to streamline event registration processes.

Role: Front-end and Responsive Design
